Try to make Bear’s shadow in front of him.

Try to make Bear’s shadow behind him.

Try to make Bear’s shadow long.

Try to make Bear’s shadow short.
When do you see your own shadow?

Do you see your shadow on a cloudy day?

Your own shadow?

When do you see the Sun?

How does your shadow look in the morning?

Where do you see the Sun?

Where do you see the Moonbear’s Shadow?

Bear's shadow scared the big fish away.

Try to make Bear’s shadow touch the fish in the pond.

What happens to Bear’s shadow as the Sun moves?
What three things do we need to make a shadow?

1) a light
2) an object to block the light
3) a surface for the shadow to appear upon

Move the Sun across the sky, from sunrise to sunset.

What happens to Bear’s shadow as the Sun moves?

What moves the Sun across the sky?
Shine the Sun straight down on Bear from above his head. Where is his shadow?

Bear wants to hide in the shade of the tree. Can you help him?
Where do you see the Sun in the sky at lunchtime?

How does your shadow look at lunchtime?

Tell me about your shadow.

Does your shadow always look the same?

Why do you think your shadow changes?

Where do you see the Sun?

How does your shadow look?
